DETAILED ACTION

Election/Restrictions

Newly submitted claim 13 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the new added claim is combination of the originally examined claim, the new added claim has separate utility such as a wrapping paper delivery mechanism disposed on an inclined attaching plate and a rail disposed on an inclined attaching plate in a direction in which the attaching plate is inclined, while the sub-combination has a vertical rail with which the roller is slidably engaged.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 13 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Canceled, originally filed claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the continuously pulled-out wrapping paper" in lines 7 and 8. There is insufficient antecedent basis for this limitation in the claim.

In claim 1, line 10; "upward and downward movable" is vague and indefinite as it is not clear movable upward and downward in respect to what?;

In claim 1, line 11; "by its own weight" is vague and indefinite as it is not clear what applicant is referring to by "its own weight"; which weight?;

Claims 1 and 2 are vague and indefinite as both claims are referring to a tension application for applying tension to wrapping paper, but unclear how such tension will be applied and achieved to the wrapping paper?; etc.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Canceled, originally filed claims 1 and 2 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 2 of prior U.S. Patent No. 7,395,944. This is a double patenting rejection.

Canceled, originally filed claims 1 and 2 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-3 of prior U.S. Patent No. 7,228,988. This is a double patenting rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Canceled, originally filed claims 1 and 2 the best understood are rejected under 35

U.S.C. 102(c) as being anticipated by Knoerzer et al. (U.S. Pub. No. 2003/0009989).

Knoerzer discloses a packaging device with the use of tension application mechanism to pull out the wrapping paper (Fig. 1; via tensioning rollers 114); the tensioning rollers depressing the wrapping paper (via pulling the wrapping paper); the rollers disposed in an operation section (via the section in which the rollers are positioned) and being slid-ably engaged in a vertical rail (Fig. 1; via such rollers installed vertically on a machine frame; broadly could be considered as a rail and the rollers slide/installed on the frame).

Response to Arguments

Applicant's arguments with respect to claims 1, 2, and 13 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
